

Hands-on Lab : Getting Started with Cognos Dashboard Embedded

Estimated time needed: 20 minutes

IBM Cognos Dashboard Embedded (CDE) is an AI-fueled business intelligence service that supports the entire data analytics cycle, from discovery to optimization. It provides users with data discovery capabilities to visually explore and interact with their data to identify the key insights for improving data-driven decisions. Users can perform data discovery and then quickly assemble that information into interactive, visually appealing dashboards, all without the need of formal training. In this lab, first you will learn how to login to IBM Cloud Pak for Data platform through IBM Cloud and create a project there. Next, you will learn how to add a Cognos Dashboard Embedded (CDE) service and upload external data files to your project ([upload CSV file link](#)). Finally, you will learn general navigation around the CDE user interface (UI), and how to start a new dashboard with a template in CDE, populate it with a data visualization as well as save the dashboard.

Software Used in this Lab

Since for the assignment of this module you will be using IBM Cognos Dashboard Embedded (CDE), so in this lab you will get started with IBM Cognos Dashboard Embedded (CDE) Lite plus service through IBM Cloud as this is available at **no charge for 90 sessions/month**. A session is a **60 minutes period** where users can perform unlimited interactions with an embedded dashboard. Lite plus services are deleted after **30 days of inactivity**.

Dataset Used in this Lab

The dataset used in this lab comes from the following source: <https://www.kaggle.com/jean-guy/cognitive-data> under a **CC-BY Public Domain License**.

Objective

After completing this lab, you will be able to:

- Login to IBM Cloud Pak for Data platform through IBM Cloud
- Create a project in IBM Cloud Pak for Data
- Add a Cognos Dashboard Embedded (CDE) service to your created project
- Navigate around the Cognos Dashboard Embedded (CDE) user interface
- Upload external data files to your created project ([upload CSV file link](#))
- Start a new dashboard with a dashboard template and populate it with a data visualization

Exercise 1 : Login to IBM Cloud Pak for Data and Create a Project

In this exercise, you will have to login to IBM Cloud Pak for Data platform through IBM Cloud and create a project there.

Task A : (optional) Create an Instance of Watson Studio / Cloud Pak for Data

- If you **already have an instance of Watson Studio / Cloud Pak for Data**, skip Task A.

1. Go to [cloud.ibm.com](#)
2. Enter your IBMid (the email ID you used to sign up for IBM Cloud) and click **Continue**.

3. Enter your password and click **Log in**.

4. Click **Navigation Menu** icon on the top left side.

5. From the navigation menu sidebar, click **Watson**.

6. Now from the section **All Services**, click **Watson Studio Start free plan**. You will see a dialog box to enter the region and the name of your Watson Studio instance.

7. Select a region matching the region of your IBM Cloud account and provide a name for your Watson Studio instance. Click on the **Create** button.

8. You will be redirected to IBM Cloud Pak (dataplatform.cloud.ibm.com) for Data platform. In case you are not redirected to IBM Cloud Pak page, you need to go to the Resource List from the Navigation Menu.

9. Select your Watson Studio instance from the AI Machine Learning section.

10. Click on Launch in IBM Cloud Pak for Data.

11. You will be redirected to [IBM Cloud Pak for Data](#).

12. You have successfully logged in to the IBM Cloud Pak for Data platform.

Task B : Login to IBM Cloud Pak for Data

• If you have completed Task A, you will already be logged in to this Task B.

1. Go to [ibmcloud.ibm.com](#).

2. Enter your IBMID (the email ID you used to sign up for IBM Cloud), password and select a region, same one you used for IBM Cloud account and IBM Cloud Pak for Data(if you have completed Task A).

3. Click Go to IBM Cloud Pak for Data.

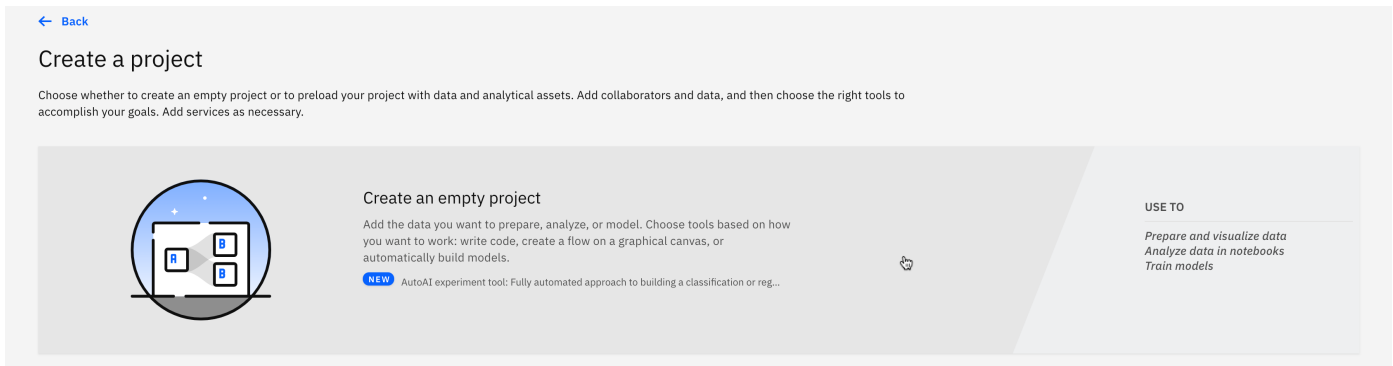

4. You have successfully logged in to the IBM Cloud Pak for Data platform.

**Task C : Create a New Project**

1. On the IBM Cloud Pak for Data welcome page, click **Create new project**.

2. Click **Create an empty project**.

3. With **Capstone Project** as name of the project and click **Add** on **Select storage service** if no storage service appears. [\[Add storage service around location & details\]](#)

4. You will be redirected to a new page. On the **Create tab**, select **Like plan**. Then click **Create**.

5. Now you will be redirected to the previous new project page. Click **Refresh**.

6. Once you see a storage service, click **Create**.

7. You have successfully created a project. Click **IBM Cloud Pak for Data** at the top left to go back to homepage.

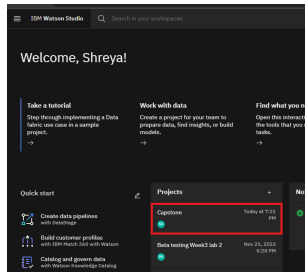

Exercise 2 : Add a CDE service and Upload External Data

In this exercise, you will learn how to add a Cognos Dashboard Embedded (CDE) service and upload external data files to your project.

Task A : Add a CDE service

1. From IBM Cloud Pak for Data homepage, go to **Projects** under Quick navigation and click on the Cognos project you had created earlier

2. Click on **Manage** tab - From the **Services and integrations** section click **Associate service**

3. Click **New service**.

4. Click **IBM Cognos Dashboard Embedded**.

5. On the **Create** tab, select a **region** and **Lite plan**. Then click **Create**.

6. Select **IBM Cognos Dashboard Embedded** service and click **Associate service** to add the service to **Cognos** project.

7. Once the service association status appears green, close the associate service page.

Task B : Upload External Data Files(Supports .CSV Files Only)

1. Download the file [get_data_data_sample.csv](#)
2. On the **Assets** page, click **Find and add data assets**. Click **Drop data files here or browse for files to upload**.

3. Browse to the file download location, select the downloaded CSV file, and click **Open**.

4. Once upload completes, `car_sales_data_sample.csv` will appear under **Data assets** section.

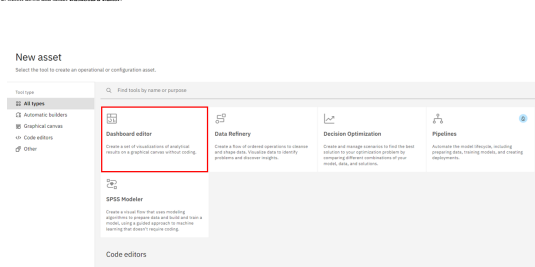

Exercise 3 : Navigate around CDE UI and Start a New Dashboard with a Template

In this exercise, you will learn general navigation around the CDE user interface (UI), and how to start a new dashboard with a template in CDE, populate it with a data visualization as well as save the dashboard.

1. On the Overview page of Capstone Project project, click **New asset**.

2. Scroll down and select **Dashboard Editor**.

3. Name the dashboard as **Simple Dashboard**. Then select a **Capgem Dashboard Embedded** service from the list and click **Create**.

4. Select the **tabbed dashboard** style. This will allow you to have multiple pages for your dashboards. Select the **one-panel template**. Click **OK**.

5. Now you have created a new dashboard using the dashboard template.

6. Click **Sources** icon from the **Navigation** panel to open the data source panel. Then click **Add a source** icon.

7. Select **Data assets**. Select **car_sales_data_sample.csv** and click **Select**.

8. From the **Navigation** panel, select **Sources** to open the data source panel, if it is not already open. The **Data Source** panel displays the file **car_sales_data_sample.csv**. Click on **car_sales_data_sample.csv**.

9. From the **Data Source** panel, select **SALES**. Drag it to the **Panel** and release.

10. Now you have successfully started to populate your dashboard with data visualizations too!

11. To save the newly created dashboard, click **Save** icon.

Congratulations! You have completed the Lab.
